Subject: Sewage Spill

Dear leaders,

It goes without saying, but we must address the sewage spills. If there is a clear action plan, it must be communicated and expedited if possible. The damage this does to the lake, personal property, and our brand as a community is inexcusable.

This community is ranked as one of the best places to live in America...and we're allowing raw sewage to dump into our waterways? Is that the national recognition we want? As citizens and leaders must take action to push through the issues / politics delaying proper resolution. It damages property value and quality of life. Forgive my ignorance, but are there no fines when these spills occur? What are the financial consequences to balance the needed investment?

I know there has been much discussion on this topic, and I personally regret not doing more sooner... We all probably do, but let this be our new and last call to action.

I ask this leadership to please let the community hear immediately what actions should be taken and how citizen can support resolution.

Sign me up to help.
